

Machine specifications

Haitian HTF120X

Year: 2007

Screw diameter: 40 mm

Injection pressure: 1600 bar

Injection volume: 214 ccm

Shot capacity: 195 g

General information:

Delivery time: Now

Machine dimensions(m) LxWxH: 4,92 x 1,33 x 1,95 m

Weight: 4000 kg

Clamping Unit 120/...

Clamping force: 120 t

Distance between tie bars: 410 x 410 mm

Mould height: 150...430 mm

Opening stroke: 350 mm

Drive power of the hydraulic pump: 13 kW

Cylinder heating power: 9,3 kW
